

INSTALLATION INSTRUCTIONS

BEACHFLAGS

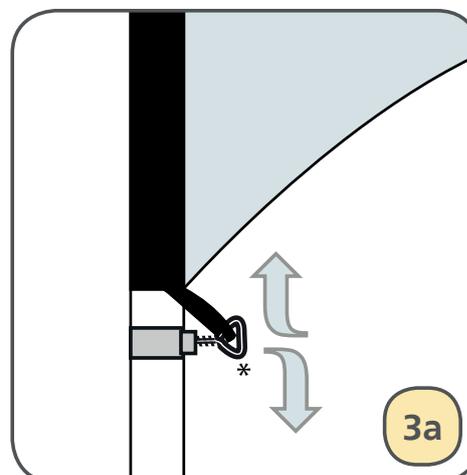

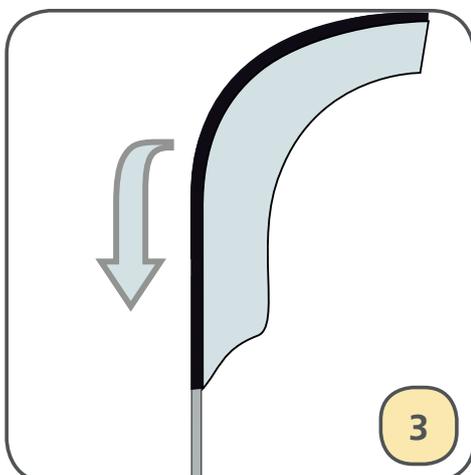

1. The beach flag set contains a flag, a stand and a carry bag.

2. The flagpole sections have spring loaded bearings to help secure the parts together.

Push the pole sections together so the bearings click into place.

Depending on the size of your flag, the number of sections vary.

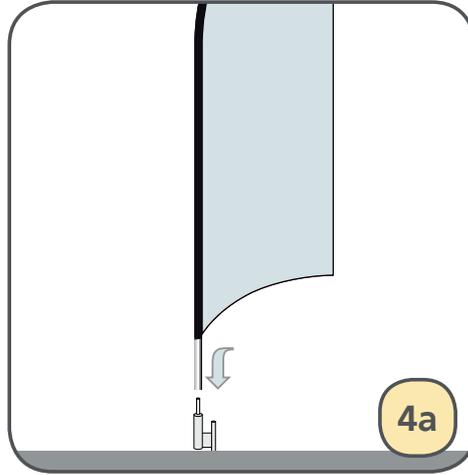

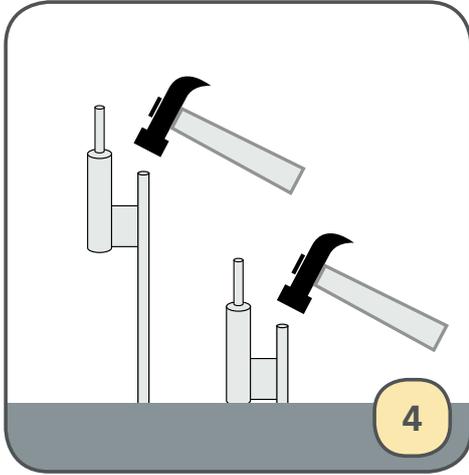

3. Pull the flag through the sleeve over the pole until the tip of the pole reaches the end of the sleeve.

Secure the flag to the pole by pulling the elastic loop at the bottom of the flag around the adjustable screw hook bracket*.

The flag should not be pulled too tight on the pole. It flags out nicely when the flag is moderately secured to the pole.

Take the flag down during very high winds. Extreme weather conditions can cause excessive tension on the pole and flag and damage the product.

Bases

4. Anchor the ground spike in the ground until only the upper part of the spike is sticking up out of the ground. This part acts as a stabilizer. Place the end of the flag pole onto the ground spike.

All other bases specified below.

Art.Nr. 7584
Ground Spike - Steel
Length: 60 cm,
ideal for harder ground
Weight: 1.45 kg

Art.Nr. 7142
Ground Plate of powder
paint coated steel
Dimensions: 40x40 cm
Thickness: 5 mm
Weight: 8kg
Color: Anthracite

Art.Nr. 8834
Ground Screw
Length: 60 cm,
for safe anchoring in
loose soil

Art.Nr. 7358
Car stand
Steel plate with rod
Weight: 4,4 kg
Color: Grey

Art.Nr. 8878
Refillable base for
water, up to 7 kg.
With wheel. Extra
weight for cross base
and ground plate. Made
of strong PVC film.

Art.Nr. 11740
Refillable foot
Water: 24kg
Sand: 32kg
Color: Dark grey

Art.Nr. 7874
Cross Base of powder
painted coated steel.
Used mostly indoor.
Height: 59 cm
Weight: 2,4 kg

Art.Nr. 7794
Refillable XL-foot
Water: 30kg
Sand: 50kg
Incl. adapter
Color: Dark grey
